

Steps to Host a Student Grading System on AwardSpace :

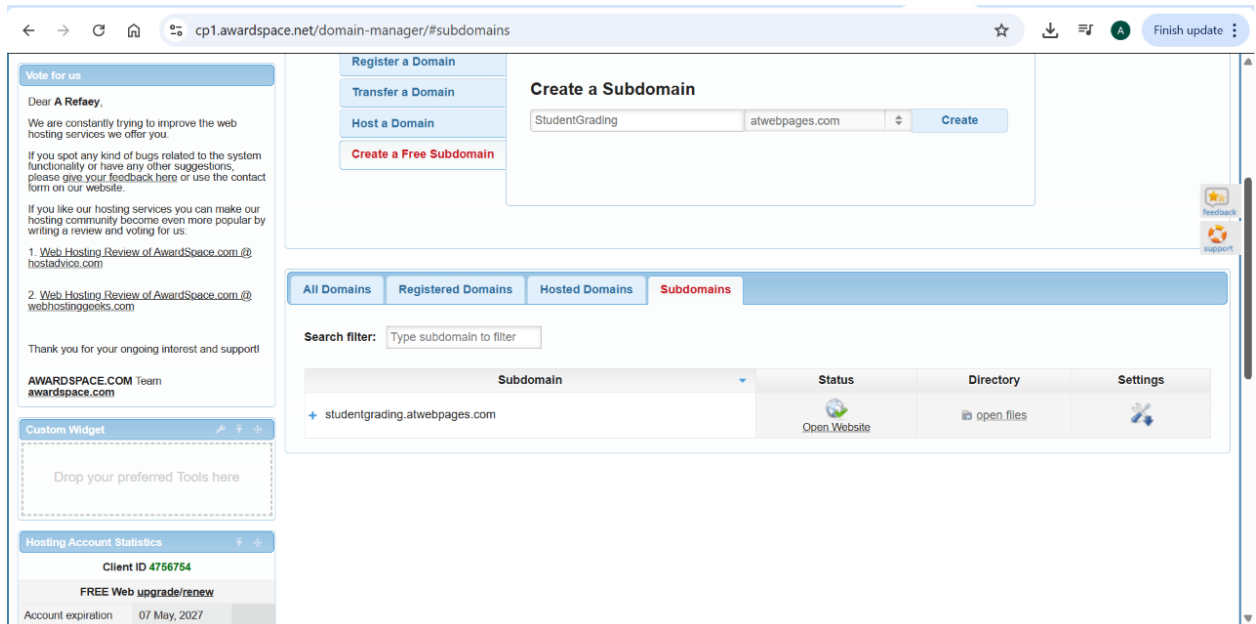

1- From hosting tools we will choose domain manager

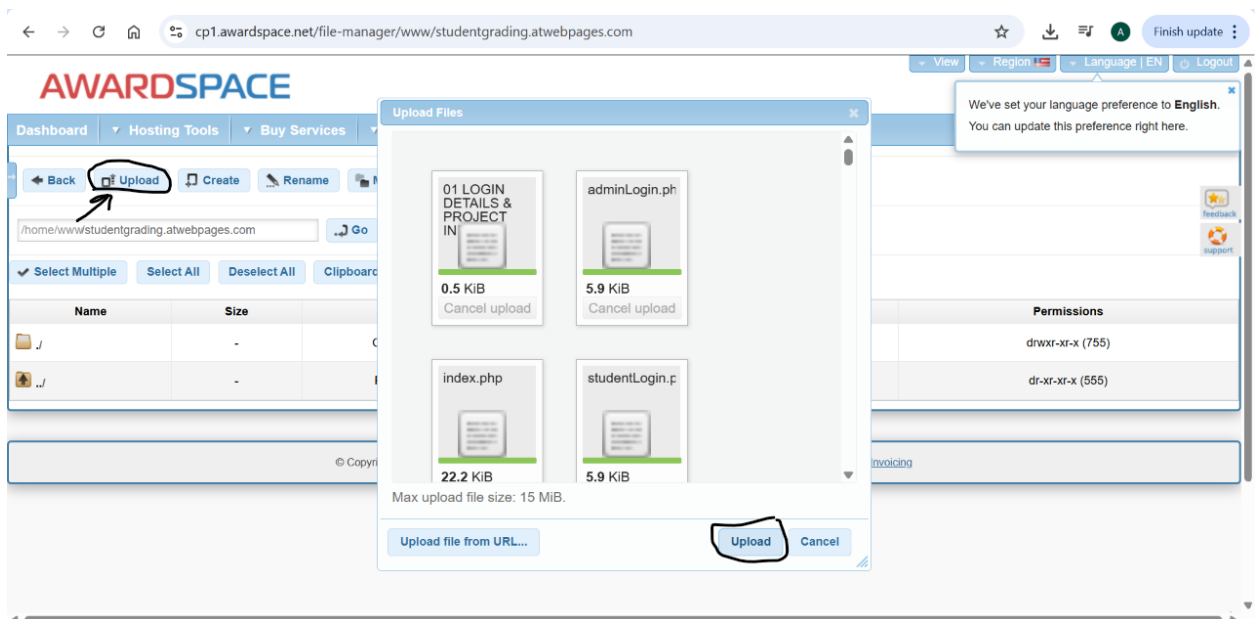

2- Then from create a free subdomain write your subdomain and press create to check if it available or not

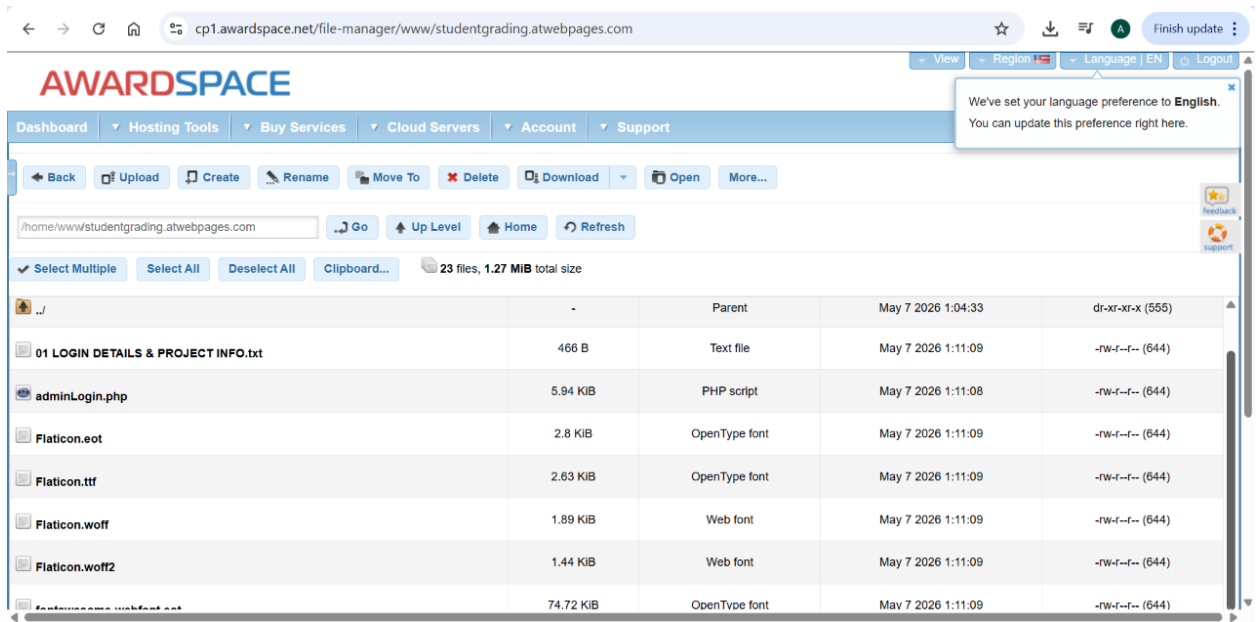

3- This appear after creating your subdomain

4- We will click on open files in the previous image and click upload and add our files and folders and press upload

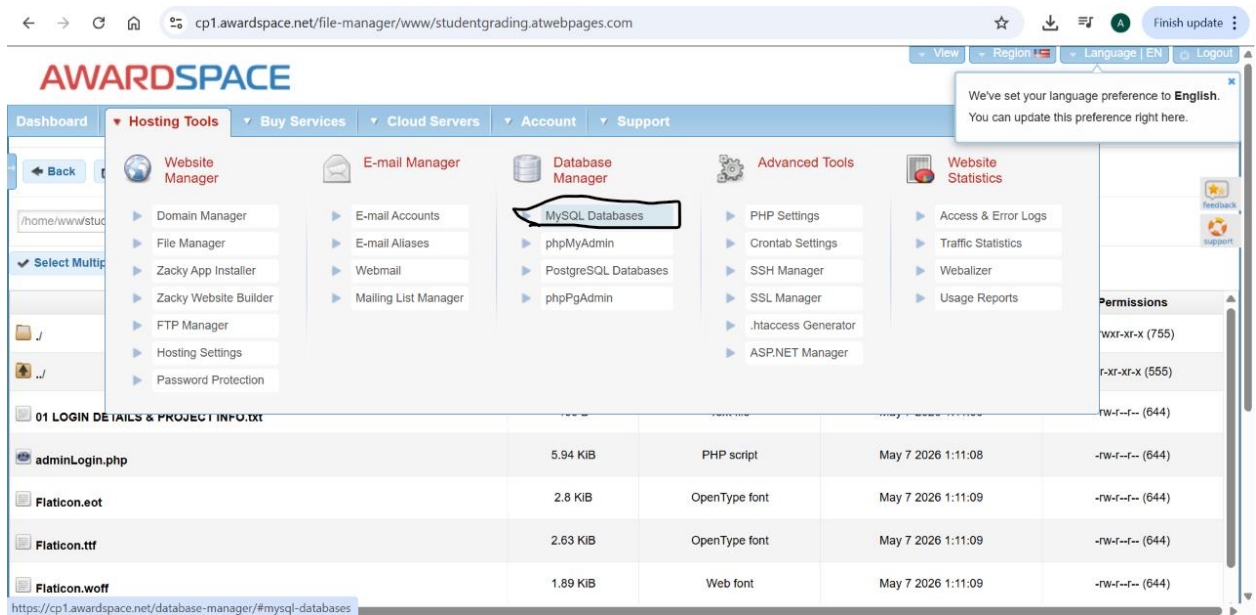

Now all system file is uploaded

Its time to make our database

5- from hosting tools select mysql databases

6- create your database

cp1.awardspace.net/database-manager/#mysql-databases

Home » Database Manager » MySQL Databases

- MySQL Databases
- phpMyAdmin
- PostgreSQL Databases
- phpPgAdmin

System Status Notifications

Service is up and running!

Vote for us

Dear A Refaay,

We are constantly trying to improve the web hosting services we offer you.

If you spot any kind of bugs related to the system functionality or have any other suggestions, please give your feedback [here](#) or use the contact form on our website.

If you like our hosting services you can make our hosting community become even more popular by writing a review and voting for us:

1. [Web Hosting Review of AwardSpace.com @ hostadvice.com](#)
2. [Web Hosting Review of AwardSpace.com @ webhostinggigs.com](#)

Thank you for your ongoing interest and support!

8- Then we import our database

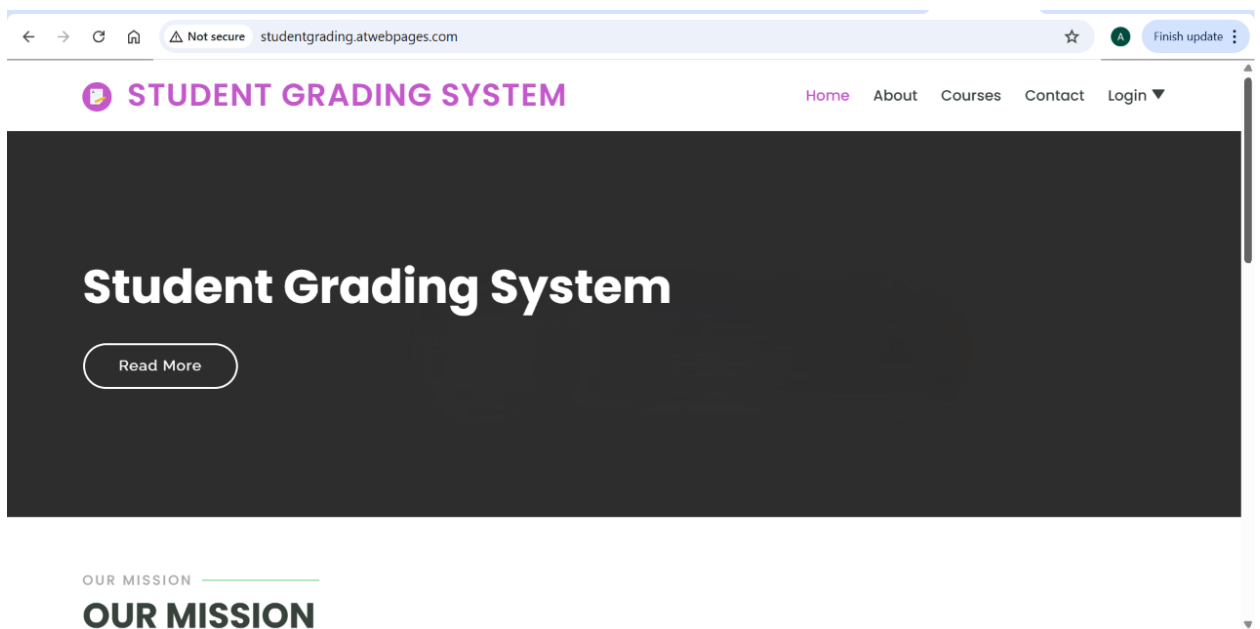

And our database is uploaded successfully

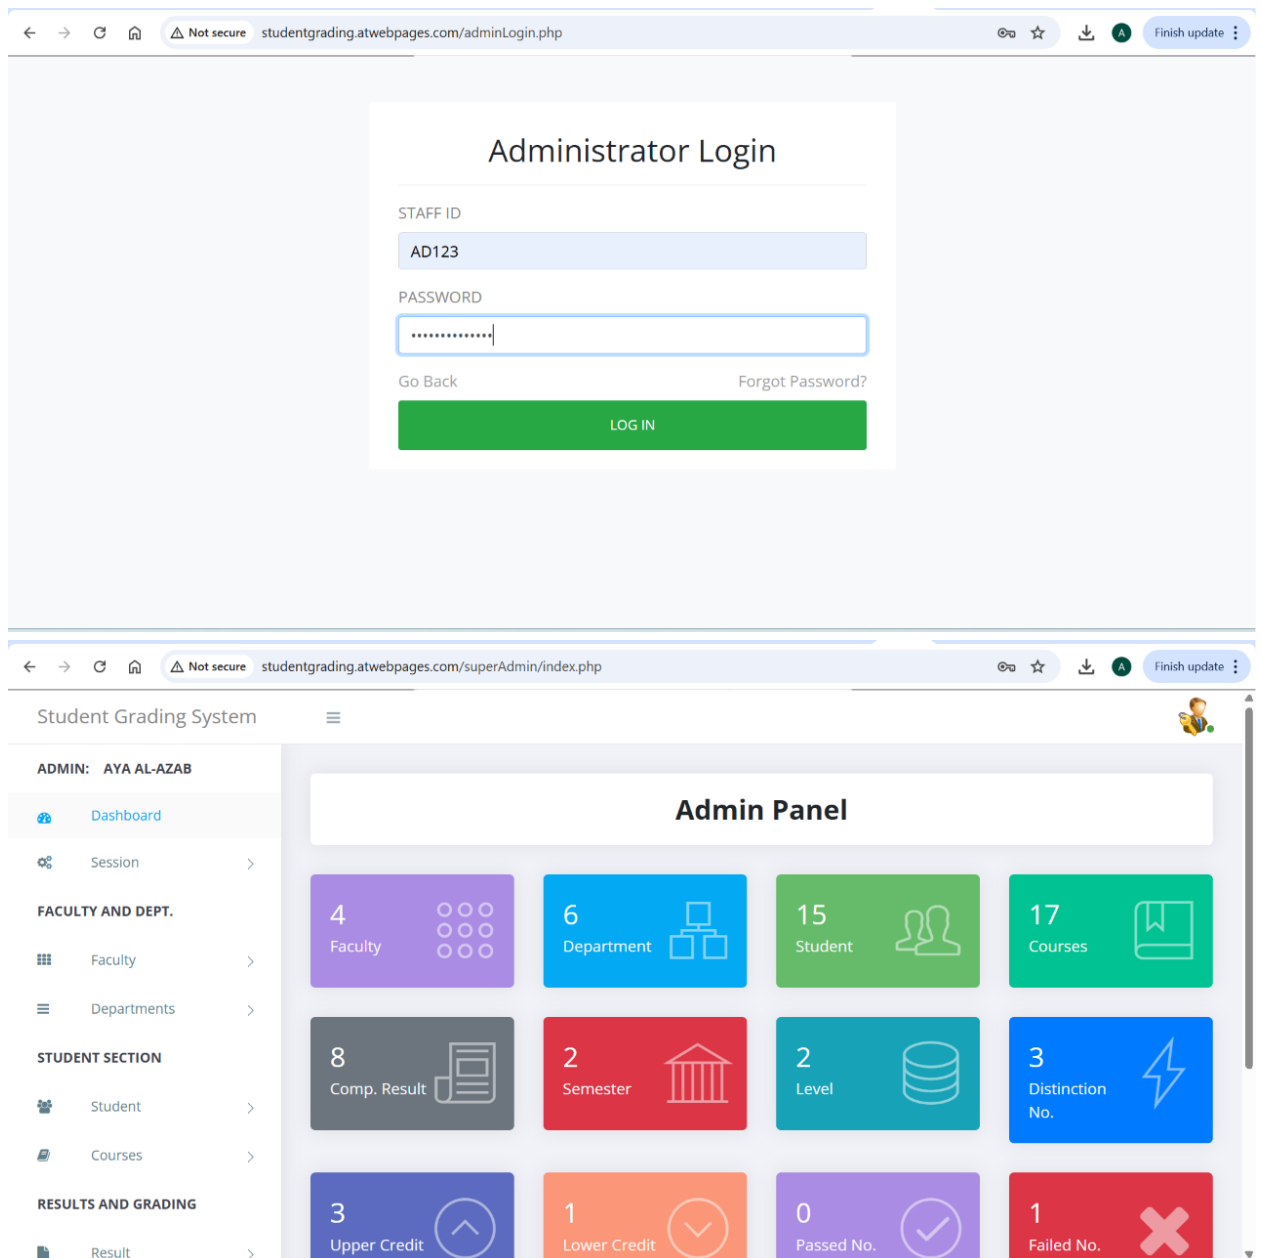

9- Then we set configurations

Now the website run and we can use it

To try it :

Admin account :

StaffId=AD123

Password= codeastro.com

Student Account :

Matric Number:123

Password: *codeastro*

And if you added a student it added successfully :
